Tosca Test Managers Meetup – 24th September 2019

Lean Coffee board topics (* - indicates votes given):

- Effective use of other tools within Tosca – i.e. Service Virtualisation, Data Management
- Tosca into Polytechnics and Universities – worth doing? *
- Sharing Custom Controls – worth doing? *
- Has anyone used the unattended execution option through the Distribution Server or the CI Client? **
- Optimising Tests **
- Scalability **
- LiveCompare and Integration *
- Tricentis Training Tracks
- Accelerator Packs
- Insights / Reporting
- Script Management in a team context. SVN / GIT **
- Auckland. How have you set up Tosca Infrastructure? How easy it is to change?
- Access to Tricentis – Customer Advisory Board?
    - o Is Tricentis going to use this feedback and will there be a loop back session?
- Australian Study Tour?
- Extendability
- Manage Change
- Accelerate
- ROI Proof – Is anyone doing this? **
- Tosca API Testing. Is it worth using instead of alternatives? ***
- Knowledge sharing *
- Peer Reviews ***
- Service Upgrades. Looking to move to Tosca 12.3. What issues can we expect on Repository? ***
    - o What do we expect from Tosca testers. Do they need to be more involved with upgrades and infrastructure changes?
- CI/CD Readiness ***
    - o Tosca integration with Azure DevOps? Triggering executions. **
- Open Source Testing Tools used alongside Tosca. JMeter etc.
    - o Tosca and Open Source. Co-exist or compete? ******
